

Cover Systems protect your motorhome investment

Top: Don't let this happen to your valuable investment... tree sap, leaves and bird droppings cause long-lasting deterioration to the paintwork, which in some cases is impossible to clean and polish out.

Above: A robust Cover Systems' recreational vehicle cover provides secure, long-lasting protection in all weather.

Below: Cover Systems' easy door access allows the owner to enter the motorhome or caravan even when the cover is in place.

You've invested big money in your motorhome or caravan. So it makes good sense to ensure it is protected all year round with a quality Cover Systems' recreational vehicle cover. The company's affordable protection system offers real benefits to motorhome and caravan owners – especially here in New Zealand where your valuable investment can deteriorate quickly under our extreme weather conditions.

That's why a strong, robust cover is so important to protect your vehicle from New Zealand's ultra-violet rays, which are among the harshest in the world, causing deterioration to every part of the vehicle, including the paintwork, window seals and fittings. Instead of spending hours cleaning and preparing your vehicle each time it is used for vacations, Cover Systems' customers are assured their vehicle looks exactly the same as it did before the cover was put on.

Knowing they can simply take the cover off and drive away in a clean, dry vehicle is a real time and money saver.

Other important advantages for protecting your investment with a Cover Systems cover are:

- Avoiding corrosion - especially if your vehicle is parked close to the coast. We all know what salt air does;
- Keeping your vehicle from aging and fading – thereby retaining its resale value;
- Providing a moisture-free environment, to avoid mould and mildew build-up; and
- Protecting window seals – avoiding annoying issues with leaky windows.

Priced from as little as \$400, Cover Systems are a far more affordable option than building a large garage. Interestingly however, many owners use the covers inside as well - to protect their precious RV from bird droppings, rodents and dust.

What are the covers made out of?

It's a triple-layered, three-ply polypropylene material with a three year warranty. A non-abrasive breathable material, it is completely waterproof to protect your vehicle in all weather conditions.

How do I install the cover?

While durable and tough, the polyprop material is very light to handle. A full instruction kit is provided with detailed instructions for easy and fast installation. And don't worry - you won't need to clamber on the roof to get the cover on!

How do I know the cover will fit my vehicle?

Cover Systems' covers come in a huge range of sizes, from a 4.5m caravan up to a 9m motorhome. Our friendly staff will advise to ensure you get the correct size for your vehicle.

Do the covers have a warranty?

Confident in its use of the latest pattern and fabric technology, Cover Systems provides a full warranty on all covers.

Can I leave the cover on to get inside?

All covers are provided with multiple panels enabling access to your door - simply unzip and roll up for the day with the cover on.

A NZ-owned and operated company based in Mt Eden, Auckland, Cover Systems' covers are all designed and developed specifically for NZ conditions. For more information, phone (09) 630 5331 or go to www.coverystems.co.nz
